

TITLE: SUPERINTENDENT

Job Summary:

Schedule, manage, and supervise all construction activities at the site of each assigned project. Responsible for ensuring each project is constructed in accordance with the contract documents, and within the confines of the budget and schedule, while maintaining high standards of quality and safety at all times.

Essential Functions:

- Schedules, coordinates, and supervises all construction activities on site.
- Ensures construction activities are performed per the contract documents and are in the proper sequence.
- Coordinates, attends, and documents all inspections and special testing requirements.
- Performs the 3-Phases of Quality Control (when a QCM is not assigned to the project) to ensure the highest quality of craftsmanship is achieved and doesn't require re-work.
- Identify, address, and resolve potential constructability risks, with the assistance of the A&E as required.
- Provide support to manage GLB employees and subcontractors on site, while enforcing company policies & procedures as they relate to all field activities.
- Document, in detail, all daily activities.
- Implement, monitor, and adjust as necessary, Infection Control Risk Assessment (ICRA) measures.
- Maintain a good working relationship with inspectors, owners/clients, architects, engineering consultants, public agencies, subcontractors, and all internal employees.
- Participate in project budgeting, subcontractor selection, schedule creation, and value engineering.
- Maintain in an organized manner, all contract documents, to include but not limited to: construction drawings, record drawings, red-line drawings, specifications, submittals, RFI's, and daily logs.
- Participate in progress meetings by providing input on progress, upcoming work, and potential delays or conflicts.
- Coordinate and supervise the delivery of materials, tools, and equipment to the jobsite.
- Ensure all delivered material and equipment are compliant with all contract documents.
- Continually evaluate work force, material, and equipment. Anticipate shortfalls and point of risk. Make necessary adjustments and notify corporate office as needed.
